

## Jandel Microposition Probe Stand

- Precision ball-bearing X-Y-theta stage with micrometer adjustments for samples up to 76 mm in diameter (25mm X-Y translation)
- Samples can be held by vacuum if necessary
- Includes one Jandel Cylindrical probe head
- Optional light shield

### Application

Ideal for probing small samples where high placement accuracy is required. An optional probe head shroud shields light from any sample up to 2" diameter.
