E.2) **Probe Array Perpendicular to Edge, Thick Sample.**

The geometric factor was calculated by Uhlir \((f)(g)\) \(\text{The result is presented here in the following way:}\)

\[
Q = \frac{G}{I}, \quad G = 2\pi s \cdot D_T\left(\frac{L}{s}, \frac{t}{s}\right)
\]

(12)

where

\(2\pi s\) is the geometric factor for a semi-infinite volume, and

\(D_T\left(\frac{L}{s}, \frac{t}{s}\right)\) is tabulated and plotted on page 19.
